

A magical Underground River hidden deep in Quintana Roo With its millenary voice, Río Secreto has told us incredible and beautiful stories. Its walls and formations are like a geological library with thousands of stalactites and stalagmites. Many of its secrets are yet to be discovered.

This site is the living example that it is possible to admire and get to know natural beauties causing the least impact, since we are a Natural Reserve that firmly believes in ecological, sustainable and responsible tourism to be able to share with the whole world this treasure that was us revealed.

Río Secreto is a value in constant evolution, it is the place where nature and human beings converge in harmony. To know Río Secreto is to know yourself, this is the place where things are possible and dreams are achievable.

A good reason to visit the city are its incredible cenotes, because in the town and its surroundings there are four cenotes: Samulá Zací, Xkekén and Saamal.
